Germany's Unwarranted Action.

Its Defense the Rankest Pretext.

Evidently the Beginning of a Policy of Tariff Retaliation.

REGION. February 2,-The Prussian Minister of Finance, Dr. Miguel, issued Dilnister of Finance, Dr. Miguel, issued a decree yesterday that goes into effect in prohibiting importations of every kind of fresh fruit. The decision has sense to all the German ports and frontier stations, excepting Bavaris, Saxony and Wurteinburg. The United States embassedor, Dr. White, sent a formal latter to the foreign office today impuired when which authority this stay was ing upon what authority this step was taken.

The United States Consulat Hamburg, Dr. Hugh Fitchin, telegraphs that 16,000 barrels of American apples have been forbidden to be unloaded, and that two trains full of American fruit have also been forbidden to cross the frontier at Einrich, which, acide from Ham-burg, is the principal place of cutry for

Darg, is this principal pulse of entry for American fruit.

On receipt of this news Mr. White sent another strong remonstrance to the foreign uffice, calling attention to the evident richation of the treuty.

At the foreign affice it was learned that the Practical government probibiles the network American fruit an another.

At the foreign office it was learned that the Pruesian government prohibits the entry of American fruit on sanitary grounds, claiming that California and uther venus the test of Gorman treus and fruits.

Washinaros, February 2.—Senator Porkins of California, whon shown the above dispatch, said the presentation of importation or senitary grounds was a more pretext and that it was merely to keep out fruits which competed with Gorman products and the order was an ontit issued as a retailstation against the United States because of the deficerantiality on successful the first said to had been decided by the Court of the California of the

Sontar Lodge of the committee on Sontar Lodge of the committee on foreign relations declined to say more than that Germany's action was in clear violation of the treaty. Senator Burraws of the committee on nance thought that the matter should be thoroughly investigated, as he said had no doubt it would be, by the executive branch of the government.

Wastingeren, February 2.—The Barlin cable announcing that Germany had
closed her ports against American fraits
attracted much attention among moinbere of the house of icopresentatives.

Mr. Hitt, chairman of the committee
on foreign affairs, expressed surprise at
the step taken, particularly that it
should not have been preceded by notice
to our representative at Berlin. Withtout discussing the multies of the movement, Mr. Hitt said it was evident Gormany based her course on sanitary
grounds, which would exclude the idea
that the move was of a political and
proscriptive character.

Mr. Hitt felt that our authorities
would take steps to learn whether any
sanitary evil could be attributed to the
cor-thour of the fruit crop in California
and if this was established in the negative he had no doubt a courteens but
firm representation would be made on
the German government with a wise to

cials of the agricultural department have as yet received no information on the subject. They are disposed to believe the typisation that importations of fresh yent will be prohibited because of danlers from vermin is not a sincere one, but that Germany, having in mind the recent legislation of the American government imposing a duty on bounty-paid sugar; has taken this action as a sort of retailation.

G. B. Brackett, chief of the pomological division of the department, in discussing the dispatch said: "It is surprising that any charge should be made that California fruit is infested with neste. The fruit from that state is the freest from vermin of any in the whole world. She has stringent have against like introduction of insect pests and diseases and has a corps of inspectors who examine all nursery stock before it is normitted to be imported. A MOUNTAIN OF ROCK

A MOUNTAIN OF ROCK.

Where the Valley Road Gets Its Material for Ballast.

The Visels Lelia gives the following secount of the Valley road's work at Smith mountain, which is the depot of ballast supply for the line:

The Valley road owns 160 acres at that point, the feature of which is the small mountain which seems to have been carried by some mosen force and dropped out on the plains. It is estimated that there is enough earth and rock on this quarter section to grade and ballast ever mile of steel rails of the road in the San Josquin valley.

This carth is loaded on care by steam power. From 100 to 125 carloade per day are loaded, and this ratement would hardly be believed unless the doubter was convinced by seeing with his own eyes the operation of the steam shovel and its capacity to dig away the crounbled earth spaines the mountain side.

The steam shove is practically the same as a dredger. The showel, a monarous affeir, is lowered and shoved into the earth, litted and then swing around over the litter and the dirt dropped through the bottom quickly. Germany has just given further evidence of its unfriendliness for the United States and it is to be hoped that its action will have the proper effect. According to a Berlin cablegram Dr. Miguel, the Prussian minister of finance insued a decree on Tuesday prohibiting the importation of every kind of fresh fruit from this country. In pursuance of this decree 16,000 barrels of apples that had arrived at Hamburg were for-hidden to be unloaded, and shipments that had arrived at other places were also beld up. The German government has given it out that the reason for the exclusion of our fruits is a sanitary one,

exclusion of our fruits is a sanitary one, claiming that Oalifornia and other peets threaten German troes and fruits.

In our opinion this is a more protext Germany has for some time past been threatening us with retaliation because of the differential duty on sugar from bounty-paying countries imposed by the Dingley law, and the prohibitory decree directed at our futts is the first step in the direction of carrying out its the direction of carrying out its threats. We believe that the time has come when we should no longer put up with Teuton arrogance, and since the Germans have plainly given us to understand that they intend to pursue a pollcy of commercial discrimination pointy of commercian intermination against us last us boldly take up the gage they have thrown down. A tariff war is an unpleasant thing, but dreumstances sometimes chaps themselves in a manner as to make it impossible to avoid such a test of strength.

The United States has been very pa-tient under great provocation. It is an old story for Germany to exclude our products on one pretext or another. Officery for Certainly a second products on one pretext or another. Thus in times past we have had to resign ourselves to have our dried apples excluded because they had been colored with deleterious chemicals, our pork has been decread against because it was diseased, and now our fresh fruits are the hard put of fearmant because it is products on one pretext or another. Thus in times past we have had to resign ourselves to have our dried apples excluded because they had been colored with deletations chemicals, our pork has been decreased against because it was diseased, and now our fresh fruits are to be kept out of Germany because it is feared that the orchards of that country may become infected with pette prevailing in the United States. If the reasons given for the exclusion of our products were truly as represented Americane would have no cause for complaint, but the fact is that they are the increat invantions. In the past we have contented ourselves with simply filling protests and areality the good pleasure of the Germany. The lease the old stand, so he and when be suggested that this covernment probibit the importation of German cut-lety and woolenne. He believes that if this were lone there would soon be an end of discrimination against American products on the part of Germany. If not, however, and matters came to the worst, we believe that the United States would be justified in protalaiming a complate ombargo against German complate ombargo against Ge

der obligation to do in this matter in relation to foreign countries is to treat them with importiality. Acide from this our sole concern is to frame such have as will promote our commercial interests. This is the policy followed by every European nation, and it is a piece of unparsielled impudence on the part of Germany to presume to question our right to do the same.

### THE SITUATION IN ALASKA.

The report of Captain Ray, U. S. A., on the state of affairs in Alacka should operate to lessen the rush to the gold fields. While the situation with regard helies. Water the state of the foot to the food supply has chenged for the better since the Captain made out his report to the authorities at Washington, the other conditions are extremely un-favorable. He declares that no new placers have been discovered in eight months, and that there is no employ-ment for any large number of people, Furthermore, he says that only a very small percentage of all the people who have entered the new country during the past year have earned their living, and that being the case it is to be presumed that most of the Klondykers have been subsisting entirely from the supplies they took with them.

of dollars transporting gold cockers to Alaska, will not be pleased with Cap-tain Ray's report, but it would be well for all would-be kiondykers to give it due attention. Let them re-member that it is from a dis-interested course, while it is the interest of the transportation comparies to give the impression that there is a fortune on the Klondyke for every-

one who has the price of the fare.

Captain Ray's statements are borne out by R. C. Kay, who writes to the San Francisco Bulletia from Passen San Francisco Relictin from Pawson City. This correspondent asys that there are no claims to be had anywhere near Dawson and that prospectors will have to travel hundreds of miles, north, esoth, eset, west, to find placer locations. Ohairman H. L. Paine of the Populist
county central committee is atthority
for the article recently published in the
likerunnan to the effect that an effort
was being made to secure the state convention for Freeno.

He requested the reporter to publish
the article referred to and asked that
the proposition be given a good notice.

No doubt the Expositor would prefire
that "those who are high in the councils of the party" and connive to keep
the Popule's party voters in the Democcratic ranks, should be looked upon as the representatives of the organization
instead of the chairman of the committee, who is opposed to fusion.

FORT WHANGER, Alaska, January 28.-The steamer Oregon of the Portland. The steamer Uregon of the Fortland-Alaska line, on her way to Alaska, anchored off Lowis island yesterday and rescued the passengers of the wrecked steamer Corona, whom were not taken off by the Al-Ki list Thursday. The sea was choppy and a fresh breeze was blowing from the direction of Dixon's entrance, but the transfer of the men, women, children and personal baggage was made with expedition.

### Dunbiful Compliments.

The compliments paid by the poor are often pet in an anasting way. One old woman who was very fend of the rector said to Mr. Bernays: "You know, sir, as likes the rector; "is caus are so clean." Surely an old reason for paresimin affection. Another admirer once declared with regard to the whole staff of chergy," You are all so plath" (a word of bigh commendation), "Int as for the vicer, "e's heartful." The greatest compliment, though at the same time the most enrious Mr. Bernaysever heard, was paid by a workingmu to a certain non measurement art. Dermysever heard, was paid by a workingman to a certain bishop, famous for his simple kindliness, "What I likes "bout the bishop is "o's not a gentleman."—Westminster Gazette.

Ethnologists, auropos of the statement that the original inhabitants of America were Asiatics, tell of a Chinook Indian woman found in the last century by fea-ther Iluk wandering in the far interior of thin tell.

Woman is largely judged by her estremities, by the way site dresses her feet and lands, and so she should have a care in selecting footgear and gloves, says a New York fashion writer. At no time are her feet as conspicuous as when in evening attire, unless she happens to a member of the Rainy Day club. Evening slippers are very smart at present. Two general styles prevail for house and full dress wear—the single strup or the double strap crossed and the laced low shoes. Black satin, slippers

Though the Restuckian Wos tte Was Besten in Another Way—Strange Story of an Old, Grewsome Looking House in San Francisco.

In 1867 there stood an old fashioned In 1867 there should not his handle, thanty cast of the locality now occupied by the Presentation convent, in front of the graveyard, and the people in the neighborhood used to tell strange stories about this growsome looking dwelling For several years its occupancy was ap-parently confined to a decrepit old man, who used to crawl in and out about once a day, his arms filled with packages from the market.

He was known in the neighborhood as the old dago, though in reality he was, a mattee of Abace. For several years he lived a hermit's life, and the neighbors got so aconstoned to his conlings and goings that even the small boys forget to nodest him. But one morning all the gos-ips found food for conversation by the appearation of a remarkably levely young woman who went out to and returned from the hatcher's stall and the groom's. She spoke English imperfectly and with a very pronounced Trench necent. This little cabin was destined to be the seeme of a very dramatic incident in the history of California gambling.

It was natural that a girl as pretty as He was known in the neighborhead as

It was natural that a girl as pretty as Ireus should not be long without adiatives of the old louss were lighted up overy ovening, and the Fremelman developed the natural hospitality of his race and gave little dinners and supposto his extled countrymen. But among those, as was only natural, there were some who existed not by honest industry, but by the gaming table. Among them was a young man of striking upperance who had served in France as sons officier in a lusser regiment, had gone the pane, ratinel himself, and family drilled out to Sun Francisco, where he became the hanger on of the gamiling table.

Louis Le Marronnis was a strikingly handsome specimen of the Parissan of

handsome specimen of the Purising of his class. It did not take him very long to gain the confidence of the old French-ment and to him he confided the steer to gain the countdenes of the old Frenchman, and to him be confided the story of his life. It was not a very eventful one. He was a member of an old Frenchman, and to him be used to the least of the extravagance of his younger brother and was then I'ving on the income of a little property in Britiany, which he had saved from the wreck. Another use has been found for the apper of iodine. This is the discovery of alterations in manuscripts. Professor Bruylats of Louvain, the discoverer of the process, noticed that when a sheet of paper which had been sized and thished was moistened and, after being thereughly dried, exposed to the vapor of iodine the part which had been moistened became violat, while the unmoistened portion became provenish yellow.

It appears that when a manuscript has been altered both the nature and extent of the alterntion can be determined by the use of iodino vapar. Those parts which have been rubbed become brownish on exposure, and when the rubbed part is subsequently moistened it becomes blue, the dupth of the odor depending on the length of time that the axposure had been allowed to proceed.

Conflict of Nature and Art.

A young man here in town who is studying drawing—I won'ts say just how or where—went out to a Welsh rubbit supper at a friend's stadio one ovening. The supper was given to celebrate an examination in light and shadow which several of the young art students had just undergone with success. The young man I speak of was full of the subject. His mind was still dwelling on it when he started home. Half an hour later a fellow art student came up with him. He was standing before me equestrian stame in one of the little rakes and was invently studying the slavlow of the bronze rider casts by the parks and was intently studying the slaulow of the bronze rider cast by the

sladow of the process assumed in moon.

"Say," said he to the other student, "bads at that shadow. I've east lots of shadows and I've studied 'ent. That ain't a latt like it. I know shadows. That nin't an angle of 45 degrees."

Here he took his friend's arm.

"Old boy," he said solemnly, "that shadow's all out of drawing."—Washmeten Post.

### FOR LITTLE FOLKS.

### A BUSINESS BOY

How a Chicago Lad Established and Car-ries on a Bread Route.
Robert Staurt is a Hyde Park boy.
Last summer he very much wanted to earn some money of his own. He thought of all the schemes that he over though or an ten senemes time to vove had heard of, and then he started an en-firely new one. He went to Mr. O'Mar-row, who had just opened a bakery in Fifty-fifth street, and said that if he was supplied with a horso and wagon he thought he could get up a profitable route of customers. Mr. O'Marrow-was ranto of costoniers. As O Materia was a little doubtful of Robert's ability, but he said that he would give Robert a commission on all the castoners he could get. So Robert started out and made a thorough canvass of the neigh

borhood, and he seen found nearly 30 families that agreed to take Mr. O'Marrow's goods if they were delivered promptly. Robert get up every morning at 5 o'clock and, manufed on his wheel, he would take a big backet of bread and bans and deliver them to his customers. The backet was firmly fastened to the bandle har of his unaching. The was so premute and observat they

customers. The business was firmly case the detection to the bandla har of his machine. He was so prompt and pleasant dust his customers increased to 50, and then he could not curry all of the bread in a basket. So he bought a little iron wagon and fitted a large basket inside of it. This he tied befind his wheel. Almost my morning; those who get up carry enough may see him splinning along the streets of Hyde Park with the bread wagon rattling along behind him. In this way Robert, although he is only 12 years old, has worked up a good hastness. He is making money, and Mc. O'Marmw never would think of parting with his services.

### How a Newshoy Helped.

They a Newslow Helped.

The other day a blind man camedown Madison street walking with his came thrust out before him and supplies the walk from time to time to see that he was not running into anything. At Lai Sallo street the crowd was dense and the cable cars and street traffic were changing noisily by. For a nonaent the blind man stood their undecided, too knowing which way to turn. The throng partetiand left him like an island in a swift stream without offering to help him. On the corner a newslow was calling the afternoon papers. He caught a glimpse of the old man and rate up, tool his arm and steered him safely across the street. Here he started blue on his way again. Then he ran hock to his phace.

"News?" he shouted as if it was the

place.
"Ness;" he shouted, as if it was the most ordinary thing in the world to help blind men across the street.—Chi-cago Record.

### Pass Spolled on Effection

A cat was recently locked in a ballot box on a Tuesday night and was not set free until the next afternoon. Pussy was asleep in the ballot box when the was asleep in the ballot box when the ballots were dropped in, and she was soon snowed under by them, and the box was scaled. On Wednesday the cat's mewing was heard, and it was found that she was in the box. The Judge of Berlion declared is would be illegal to open the box, but the cut made such a noise that consect was consided an lussy was liberated. Else had torn the ballots into sheads in her frantic efforts to occure. to escape.

Melting Irm.

The working and works of the great furnaces in this country are interesting in the extreme to those who are fond of knowing the processes by which familiar articles are made. At one of these establishments 2,000 tons of iron ore coken and limestone are consumed each day. Long trains bring this mixture, which is known to the workinen as "buyden," into the workinen as tronglit up on trestles and emptied hate long him. The restles and emptied no brought up on trestles and empted are brought up on trestles and empted hat o long him. The furnace is kept full and burns continuously. The cases rise

and are carried off, and the solid mutter, gradually dissolving and softening, stendily descends, when the space thus left vacant is immediately filled by the "burden." An examination of the interior of the farmed would show a top layer of erude material with a temperature of about 500 degrees F. A few feet below this the temperature of 1,000 degrees F. I have deep the form the capacity F. I have deep the degree F. I have deep the degree F. I have deep the form the capacity from the capacity from the ore and formed carbonic acid and lime. He eachly this there is a stratum with a temperature of 1,600 to 1,700 degrees. In this the iron is reduced from the cream it is taking up carbon. Below this the iron is melted and illis the receptables. Above the iron is the slag, which as expect through a hole at the top of the hearth. At the bottom of the hearth is a narrow opening from which the cast iron is taken. A furness is tapped six times a day and furnishes about 700 tons of iron daily. When the furnace is compty, the tap hole is closed with clay. When it is again filled, this clay is broken out, and the melted metal at a white heat flows down through the channels, spreading to the right and left into the smaller depressions prepared for its reception. These are so arranged that the modes at the extreme edges fill first, and those near the furnaces in the last ones to be completed.—New York Ledge.

### The Drend of Denth

To look upon the face of a friend as he goes away; to be one of a group whose texts will not cease, while the ho goes away; to be one of a group whose faces will not cease, while the one who is dying is calm, confident and triumphant; to listen to lasting good-bys spoken as if only a short and beautiful journey were ahead; to see pain soften itself into peace and a tired and worn hody go to skeep like a weary-child—that lakes away the dread of death as nothing clea can. When a strong man or fruit woman looks upon such a slight, in feats, "Well, I, too, dare go along the pathway that has been so light before the feet of the one I love." It may seem as if meditation and eath were not wise, but that is a mistake. Brooding over it no doubt leads to fear; but, on the other hand, more fear and suffering result from the surprises of these who leave been too greaterly guarried from the face of the guest who "knocks at the palace and the cottago gate."

guest who "knocks at the palace and the cettage rate." We should not stay long in the charnel house, but it is good now and then to look in, at least often enough to say that it is not always a place of chills and glooms, but for many a numeron of peace and rest. Look upon the face of a good man who is waving his farewell to the earth, and you will understand that he is embarking on no wild sea. Listen to lie goodleys of those who have loved you, and it will not have build to speak your own when the moment to speak them comes.—Rev. Amory H. Braddon.

### RAILROAD RATES

American Roads May Fight the Canadian Pacific.

The Latter Refuses to Come to an Arrangement on Alaskan

Business.

Business.

Onteaue, February 2.—Uniess the Canadian Pacific alters the attitude it has assumed against the Western roads in the matter of Alaskan rates it is possible that there will be a concerted movement among all the American roads to ignore it entirely and to refuse to always any further dealings with it in passenger traffic. It has steadily re-used to meet with the American roads to discuss matters and simply refused to discuss matters and simply refused to describe the western roads, after a short season today, cent a message to the Canadian Pacific asying that if it was convenient for a representative of the Canadian Pacific to come to Chicago at the present time they would be giad to have the Canadian Pacific name a date on which its representative could meet a committee of the Western roads, other in alonated or New York.

To this a reply was received today after the adjournment of the meeting to the Genetith of the Canadian Pacific name a date of the Canadian Pacific name and the committee of the Western roads, other in alonated or New York.

To this a reply was received today after the adjournment of the meeting to the Genetith of the Canadian Pacific name the committee of the Western roads, after the adjournment of the meeting to the effect that it would not be convenient for the Canadian Pacific near they had done all that they felt that they had done all that hey had the pacing with the Canadian Pacific, but it the road would not consider the question of reduced rates for the North American Turnors' convention to be held at San Francisco, July 6th, the tonb triennal connection of our of the Western roads and the restonation of

sanh triennial council of Courregational, churches to be hold of Portland, Or., July 7th to 13th, and the national convention of the Woman's Christian Temperance Union to be held at Los Angeles in November, have recommended that while it is the general desire to be in a position to make suitable excursion rates for these sexurations, consideration thorsef be postponed pending action on the anti-scaling bill now lustone congress, the passage of which should make it possible to simplify ticket arrangements and permit of the granting of other concessions in the way of dates of sales, limits, etcopovers, etc., which, under existing conditions, are impractically. while it is the general desire to be in a position to make suitable excursion rates for these exmralons, consideration the substance of positioned penning action on the anti-sensing bill now bustone congress, the possage of which should make the substance of the grating of other concessions in the way of dates of cales, limits, etopovers, etc., which, under existing conditions, are impracticalle.

The officials of the Wisconsin Central deny that that road has made any arrangements with the Canadian Pacific regarding the interchange of passager traffic at St. Paul. They declare that the deal has never been contemplated and that it has been set in circulation by competitors of the road with the hope of destroying the cordial relations consisting between the Wisconsin Central and the Great Northern and the Northern Pacific.
